Kablor Trading Enterprise is currently in the process of securing funding to develop student accommodation in Secunda, Mpumalanga. The land for the development has already been secured, which significantly reduces the project risk and demonstrates our commitment to the initiative. The proposed accommodation will primarily serve students attending the Gert Sibande College in Evander, located approximately 15 kilometres from the site, where there is a growing demand for safe, affordable, and accessible student housing. This project aims to support student success by providing a conducive living environment while also contributing to local economic development and long-term sustainable income for the business.

400 beds in Soweto. Close to UJ Soweto Campus

I am in the process of expanding 8 more units at the current property. I currently have 2 ensuite in the yard, main house also rented however it needs to be demolished to add more units. I also have another property at Orange farm with huge yard, main house rented, my wish is to build outside rooms as its closer to a mall, maybe 2/3 rooms with shared shower.

we housing uj students here

A state of the art 2000 bed facility for STEM students in Hatfield, multiple potential sites but all within walking distance to campus. Furnished with amenities that support modern student living with a canteen and makerspace. The project will cost a billion rand.

My student accommodation project is designed to provide affordable, safe, and community-oriented housing for university students. The concept focuses on three main pillars:

- Accessibility & Affordability

Rooms are priced to be budget-friendly, with flexible payment options so students can focus on their studies rather than financial stress.

- Modern Facilities & Comfort

Each unit includes essentials like Wi-Fi, study areas, shared kitchens, and recreational spaces. The design balances privacy with opportunities for social interaction.

- Community & Support

Beyond just housing, the project encourages a supportive environment with mentorship programs, events, and wellness initiatives to help students thrive academically and personally.

At its core, the project isn't just about providing a place to stay—it's about creating a vibrant student community where learning, collaboration, and personal growth can flourish.

I want to purchase a hotel and convert it to student accommodation

I bought 200x200 mete, 5km from Nkuna Kraal Mall and 60km From Giyani Tut Campus and I am currently busy with students accommodation plan paper work.

This project is a purpose-driven student accommodation development located on a 3,000m² vacant site in Ga-Rankuwa, strategically positioned within an 8km radius of Sefako Makgatho Health Sciences University and Tshwane University of Technology—two highly recognised institutions with strong and growing student populations.

The site is zoned Business 2, allowing for high-density, mixed-use development. The project has the capacity to deliver just over 300 beds, addressing the significant shortage of structured, high-quality student accommodation in the area.

Strategic Positioning

Located near Student City Ga-Rankuwa in Unit 9, an existing student accommodation development with over 1,000 beds that is fully tenanted, demonstrating strong and proven demand.

No existing Purpose-Built Student Accommodation (PBSA) in Ga-Rankuwa, creating a first-mover advantage opportunity.

Positioned to serve both universities, which collectively represent one of the most concentrated student populations in the region.

Development Offering

The development is designed as a modern, student-centric living environment, incorporating:

2-bedroom apartment units (a differentiated offering compared to the saturated bachelor-room market)

Convenience store for daily essentials

Student centre for group study and collaboration

Laundry facilities

On-site gym

Printing and academic support services (vendor-operated)

This design not only caters to students but also introduces flexibility for alternative residential use, helping to de-risk the investment by appealing to the broader affordable housing market, including young professionals and small families.

Accessibility & Transport

To enhance convenience and safety:

A dedicated shuttle service will transport students to and from campus

Operates hourly, with extended hours until 8pm during exam periods

Financial Overview

Estimated Development Cost: R65 million

Total Capacity: ±300 beds

Rental per Student: R5,200 per month

This pricing is positioned competitively within the market while offering superior quality, amenities, and security compared to informal or lower-grade alternatives.

Investment Rationale

Proven demand (evidenced by nearby fully occupied developments)

First PBSA offering in Ga-Rankuwa

Differentiated product (2-bedroom units vs. bachelor rooms)

Dual-market appeal (students + affordable housing segment)

Strong rental yield potential driven by proximity to major institutions

We have a family house that is just a street away from one of TUT campuses in Gauteng that has a high potential of being turned into a student accommodation and we are looking for

funding to build the right structure and to furnish it.

The project involves the development of a 5,200 square meter parcel of land designated for residential and business use. The site presents an opportunity to design and construct housing units that cater to market demand, with a focus on maximizing land utilization, functionality, and long-term value. The development will consider key factors such as zoning regulations, infrastructure access, and community integration to ensure a sustainable and commercially viable residential project.

Student accommodation

Emerging and Start-up Developer.

Implementing agent for Kokosi Market Square, a shared shopping facility planned for establishment in Kokosi Extension 3 in Merafong Local City Municipality with the aim to enhance to basic infrastructure and support micro and small businesses enterprises while making basic amenities accessible to local community.

I bought a land at Sunnyside next to University of Pretoria that is 1800 square meters. Plan is to build a student accommodation. The land we bought it through the bank and we are paying R1000 per month

The 29 Kotze Student Accommodation Project is a Braamfontein-based development I am advancing as part of a focused effort to deliver practical, affordable student housing in high-demand urban nodes. Positioned within walking distance of key tertiary institutions, the project directly responds to the persistent shortage of quality, well-located student accommodation.

My approach to the development is execution-driven — prioritising efficient design, cost control, and operational sustainability from the outset. The scheme incorporates a range of room types, from single to shared units, supported by functional communal spaces and secure, access-controlled infrastructure. The emphasis is on delivering a product that is not only affordable, but operationally resilient and responsive to student needs.

This project represents a step toward building a scalable student accommodation platform,

grounded in real delivery experience rather than concept. It is currently moving through funding and approval processes, with active engagement from key stakeholders, including the National Housing Finance Corporation (NHFC).

I am seeking to acquire and reposition two strategically located properties adjacent to the University of Johannesburg, with a total project value of approximately R20 million. The intention is to convert these assets into high-quality, sustainable student accommodation that responds directly to the growing demand for safe, well-managed, and affordable housing in the area. The project is underpinned by a strong focus on operational efficiency, ESG-aligned design, and long-term income stability, while also contributing to the broader objective of improving the student living environment. Through this initiative, I aim to unlock value through adaptive reuse, deliver institutional-grade product, and create a scalable model for future student accommodation developments.

I am interested in student accommodation with the right funding and strong property connections

It's 465 beds student accommodation, in Pretoria north. We need an equity partner

My project plan is to build a facility that will accommodate 100 students for a start.

TOSTAY PROPERTIES is a premier student accommodation provider, dedicated to delivering exceptional living experiences for students in a safe, comfortable, and supportive environment. As a trusted property management company, we specialize in offering high-quality, conveniently located accommodations tailored to meet the unique needs of students.

Our portfolio features a range of carefully curated properties, each designed to foster a sense of community and academic success. With a focus on comfort, security, and convenience, we provide students with a home away from home, allowing them to thrive in their studies.

Our services include property management, maintenance, and support, ensuring that every aspect of our residents' living experience is seamless and stress-free. Our experienced team is committed to providing excellent customer service, responding promptly to all inquiries and concerns.

At TOSTAY PROPERTIES, we understand the importance of a stable and supportive living

environment in achieving academic success. Our goal is to create a vibrant and inclusive community where students can grow, learn, and flourish.

Whether you're a student seeking accommodation or a property owner looking for a reliable management partner, TOSTAY PROPERTIES is your trusted choice for exceptional student living experiences.

Construction of 900 Bed purposely built, situated in Scottsville PMB KZN. We are at Funding stage of R220 Million.

Existing building which can house 217 students, in Pretoria

Smart Student Accommodation building

This project focuses on developing affordable, modern student accommodation using refurbished shipping containers. The aim is to provide cost-effective, sustainable, and quickly deployable housing solutions near universities, addressing the growing demand for student housing. Each unit will be designed for comfort and functionality, incorporating energy-efficient systems such as solar power, smart lighting, and water-saving technologies. The development will combine innovative design with practical living spaces, creating a safe, stylish, and eco-friendly environment for students.

200 bed+

I'm having a block of flat with 13 units and I need conversion for student accommodation and close the shop at ground floor and covert it to communal gym, tv and some dormitory rooms.

The property is fully paid up and is currently let as flat.

I need funding for partitioning with boards and furniture purchases, installation of wifi, security system and accessories.

Almost 50 students can be accommodated into the premises.

I'm currently working on the architectural designs for compliance.

An Eco-Lodge Development with Cabins in a game farm with hiking trails.

FixrBuddy is a property management platform that streamlines maintenance, utilities, inspections, and asset tracking to drive smarter, more efficient student housing operations.

The property is currently a dilapidated hostel, that we want to convert into a student accommodation. There is potential for 90 single units. On offer to purchase the property was submitted, funding is required to finalize the deal. The property is fully serviced.

We acquired a land which has been earmarked for student accommodation which is in close proximity to the Pretoria University

Residential flats converting into Student Accommodation

Expanding student accommodation business by purchasing another property adjacent to my current property

I have identified an opportunity in Mayfair, Johannesburg to build about 12 residential apartments with an estimated rental of R8000 per unit. The estimate development cost is about R8 million including demolition. The land cost is about R1.2 million. It's a double stand.

The 29 Kotze Student Accommodation Project is a planned purpose-built student housing development located in Braamfontein, Johannesburg, within close proximity to major tertiary institutions. The project aims to provide safe, affordable, and well-managed accommodation tailored to the needs of 278 students from diverse socio-economic backgrounds.

The development is designed to offer a mix of room configurations, including single and shared units, supported by quality communal amenities such as study areas, recreational spaces, and secure access-controlled facilities. The project places strong emphasis on student well-being, convenience, and an enabling academic environment.

Led by experienced promoters with a proven track record in student accommodation, the project forms part of a broader strategy to scale affordable student housing in urban nodes.

The development is currently progressing through funding and approvals, with engagement from key stakeholders including the NHFC.

It is a student accommodation 4 storey building in Johannesburg. When complete it will accommodate 104 students. It is a single room accommodation. The project is almost complete needing at most a month to complete the construction.

My project is based on an investment property that will be fully tenanted and will require debt funding that I will pay back overtime along with interest

To learn more about the Student Accommodation funding and Land acquisition

I'm in a process of buying a property that will be converted into student accommodation. The property is in Pretoria CBD. Is 64 units which will produce 286 beds

The proposed Peu Student Home is a 30 bed purpose built student accommodation project, located in Zone 2, Garankuwa, Gauteng. The project seeks to address the lack of safe and affordable student housing in South Africa. Peu Student Home seeks to assist students of Tshwane University of Technology (TUT), GaRankuwa Campus

Philadelphia" student accommodation is a development with 48 units that will be converted to 240 student beds located at Erf 1109, 164 Hamilton Street, Arcadia. The estimated capital cost of the project is R 47 461 664 and is planned to take 3 months to complete from inception date.

SECTION 6: COMMITMENT

Are you available to attend the summit physically? Please note tickets are not transferable

41 responses

SECTION 7: FINAL COMPETITIVE EDGE

Why should BeMore choose you?

39 responses

I believe Bemore should choose me to win the free ticket access because I am someone who is committed to personal growth, entrepreneurship, and making a real impact in my community. I am actively involved in business, investment initiatives, and community development projects, and opportunities like Bemore would equip me with the knowledge, network, and inspiration to grow even further. I am not only investing in my own growth but also in empowering others through the projects and initiatives I am building. Attending Bemore would not just benefit me, but the people and communities I work with, as I always believe in learning, growing, and coming back to uplift others.

7 years track record of successful property investment

Property is my passion, I would love to see myself expand and grow to be able to manage it myself and have mentorship throughout. Currently more Funding is required to see my wishes come true.

because housing the students is our main focus and we make sure they are happy and live in high standard place

I have a vision to re-invent student housing - as a catalyst for problem solvers and a place of peer learning and mentorship. Purpose built student accommodation should be an advantageous place, geared for the success of the student and the country. Lastly, this opportunity will afford me a chance to combine my business skills with engineering to build a scalable and impactful product.

As a built professional, bringing over 13 years of experience in construction and project management, currently serving as a Project Specialist Engineer at Sasol. My career has spanned major projects with the Development Bank of Southern Africa, the National Heritage Council, and Sasol's Retail Network Development, where I have consistently delivered projects on time, within budget, and to the highest quality standards.

My academic journey—National Diploma in Building, PGD in Project Management, BTech in

Construction Management, and MSc in progress—reflects my commitment to continuous growth. I am well-versed in NEC, FIDIC, and JBCC contracts, advanced project planning tools, and stakeholder engagement, enabling me to manage complex projects with precision and empathy.

Beyond technical expertise, I have demonstrated leadership by mentoring local labour under the Thabo Mofutsanyane District CWP Program and managing multidisciplinary teams. I believe that building environments is not only about structures but about fostering communities, sustainability, and opportunities for growth.

This mentorship programme aligns perfectly with my vision of becoming a leader who shapes the built environment responsibly and innovatively. I am eager to learn from seasoned professionals, contribute my expertise, and continue developing as a professional who builds futures, not just facilities.

I believe I am a strong candidate for this property development programme due to my unique combination of technical expertise and financial acumen as a Quantity Surveyor. Through my experience in the built environment, I have developed a deep understanding of cost management, project feasibility, procurement strategies, and value optimisation across the full project lifecycle. My exposure to both construction and finance enables me to assess developments not only from a design and delivery perspective, but also from an investment and return-driven standpoint. I am particularly driven by the opportunity to contribute to sustainable, efficient, and commercially viable developments, and I bring a disciplined, analytical approach to decision-making. This programme aligns perfectly with my career trajectory, and I am confident that my skills, work ethic, and commitment to excellence will allow me to add meaningful value while also maximising the learning opportunity presented.

BeMore should select this project because it represents the future of inclusive, scalable PBSA development in South Africa rooted in township transformation, strong fundamentals, and meaningful impact.

This is not just a student accommodation development—it is a township-led investment opportunity in Ga-Rankuwa, strategically positioned to serve students from Sefako Makgatho

Health Sciences University and Tshwane University of Technology, where demand is already proven and supply remains largely informal.

What makes this project particularly compelling is its ownership and empowerment structure. The development is 51% woman-owned, with the remaining ownership held by youth, directly aligning with South Africa's broader transformation, inclusion, and economic participation objectives. It is a model that ensures that value created by the asset stays within the community it serves.

From a market perspective, the opportunity is clear. The nearby Student City Ga-Rankuwa is fully tenanted, confirming strong and sustained demand. Yet, there is still no formal PBSA offering in Ga-Rankuwa, creating a first-mover advantage for a high-quality, purpose-built product.

The development goes beyond accommodation by driving tangible social and economic impact:

Job creation during construction and operations

Support for local businesses through on-site retail and services

Economic stimulation within Ga-Rankuwa, contributing to long-term community upliftment

In addition, the project is backed by OTL Group's broader strategic land portfolio, including sites in middle-income areas. This provides a defensive long-term valuation strategy, enabling portfolio growth, risk diversification, and future development scalability beyond a single asset.

Importantly, the product itself is designed to de-risk investment performance. By offering 2-bedroom units instead of bachelor rooms, the development caters not only to students but also to the affordable housing market, ensuring flexibility in occupancy and resilience across economic cycles.

Closing Impact Statement

BeMore should choose this project because it delivers on all fronts commercial viability, social impact, transformation, and long-term scalability while redefining what PBSA can look like in township economies.

I am committed to this project. The family house is located in the perfect area that is just a walking distance to campus and this is a lucrative investment for all involved.

because I have a clear, practical plan to develop the 5,200 sqm site into a high-value residential project. I focus on maximizing returns, managing risks, and delivering a quality development that meets market demand.

Strategic Advisory Capacity

I am a enthusiastic about Propert Development and willing to learn and grow in the Sector.

I believe the BeMore Developer Catalyst Programme offers a unique opportunity to grow not just as developers, but as problem-solvers who can create meaningful impact. What draws me to your Developer Catalyst Programme specifically is strong focus on innovation, mentorship, and real-world application of technology.

The programme has demonstrated a commitment to fostering talent through hands-on learning, exposure to cutting-edge tools, and collaboration with experienced professionals. This aligns perfectly with my goal of continuously improving my technical skills while also understanding how to apply them in practical, high-impact environments.

Additionally, your emphasis on a supportive learning culture and professional development makes your programme stand out. I am particularly excited about the opportunity to work on real projects, receive guidance from industry experts, and contribute to solutions that matter.

Ultimately, I am excited about BeMore programme because I see it as a place where I can accelerate my growth, challenge myself, and become well-rounded developers while adding value to my team.

I am pationate with student accommodation business and my dream is to own students accommodations

I am currently in the process of developing the 29 Kotze Student Accommodation Project in Braamfontein – not from a conceptual standpoint, but from an execution perspective that involves structuring funding, navigating approvals, and preparing the asset for delivery. My

focus is on building student accommodation that is practical, financially sustainable, and responsive to real market demand.

Attending the 7th Annual Student Accommodation Summit would significantly strengthen my ability to deliver. Access to experienced developers, funders, and operators will provide insights and relationships that directly impact how I structure, fund, and operate this and future projects.

I approach this sector as a builder — someone committed to getting projects off the ground and into operation. Sponsorship would enable me to accelerate that journey, while also contributing a perspective that is grounded in implementation, not theory.

I intend to convert the opportunity into tangible outcomes — stronger partnerships, improved project execution, and ultimately, more beds delivered to the market.

BEMORE should select me because this is not a speculative concept—it is a well-defined, execution-ready opportunity with clear market alignment and scalability. I am targeting two properties adjacent to the University of Johannesburg, where there is persistent undersupply of quality student accommodation, and I have a structured plan to convert them into sustainable, income-generating assets at an approximate project value of R20 million.

My approach combines development insight, real estate advisory experience across African markets, and a strong understanding of institutional requirements—positioning the project to move beyond concept into bankable execution. Importantly, I am not only seeking capital, but strategic alignment: access to funding partners, deal structuring support, and the discipline required to package this into an institutional-grade opportunity.

This project is replicable, scalable, and impact-driven—addressing a real housing need while delivering stable, long-term returns. BEMORE's platform is best suited to accelerate this from a focused pilot into a broader pipeline of student accommodation developments.

I am a young enthusiast with a good budget, I look forward to not only building student accommodation but giving back to the less unfortunate youth who remind me of who I once was.

I am investor ready and you wont regret

IAM a woman with a dream. My goals and objectives have to be fulfilled. All I need is access to information.

I'm excited about the BeMore summit! As a young entrepreneur and founder of TOSTAY PROPERTIES , a student accommodation provider, I'm passionate about creating supportive living environments that foster academic success. I'm looking to scale my business and expand my property portfolio, and I'm eager to connect with like-minded investors and industry leaders who share my vision. I'd love to share insights on the student accommodation market and explore potential opportunities for growth and collaboration. My youth and drive bring a fresh perspective to the table, and I'm excited to meet someone who can help take my business to the next level.

Because I need this and my project is almost ready. Just funding outstanding. I have already raised the equity

BeMore should choose me representing Blackwell Trading and Projects, because I specialize in creating innovative, smart student accommodation buildings designed for the needs of modern students. My focus on integrating advanced technologies allows me to deliver efficient living spaces that prioritize comfort, security and sustainability. By partnering with me BeMore can benefit from my experience and commitment to quality, transforming the student living experience into something more engaging and supportive in today's educational landscape.

Why Invest in My Business

At Kitchen Party Solutions, we deliver affordable, scalable student accommodation using refurbished shipping containers. Our model reduces construction costs and timelines, enabling faster deployment and quicker returns.

Each unit is designed with energy-efficient systems such as solar power and water-saving solutions, lowering long-term operational costs and increasing asset value.

We address a high-demand student housing gap with a solution that is sustainable, adaptable, and easy to scale across multiple locations.

In short, we offer low-cost development, rapid implementation, and strong growth potential—a smart investment in a market that continues to expand.

I would like to position NSM Capital not simply as an attendee, but as a strategic contributor to the success of your property development summit. Through NSM Capital, I work at the intersection of Capital raising, deal structuring and investor readiness. At the same time, I am very passionate about property development and highly committed to building and scaling my own property development business. This allows me to engage with the summit not only from a funding perspective but from the mindset of someone who understands the real journey of developers. I believe my participation would add value by helping bridge the gap between developers and practical funding opportunities, while also contributing meaningfully to the conversations and long term impact of the event

I'm new entrant but have vast experience in property planning and development. I have another more units planned in the future and hope will make good partnership to grow my business through financial support.

It would give us a platform to get relevant information for support to Kickstart our project.

FixrBuddy should be chosen because we are solving a real, high-cost problem in the property industry with a practical, scalable solution that is already being used in the market. Property management across South Africa and the rest of Africa is still largely manual, inefficient, and reactive — which leads to wasted money, poor maintenance, and frustrated tenants. FixrBuddy changes this by giving landlords and property managers a single platform to manage maintenance, inspections, utilities, and assets more efficiently.

What makes us stand out is not just the idea, but the execution. The platform is already built, we have a paying client, and we are focused on scaling into large student accommodation and multi-unit residential portfolios where the impact is immediate and measurable. We are not pitching a concept — we are pitching a working solution with real traction and a clear path to growth.

This competition would give us the opportunity to accelerate something that is already moving, and in return, we bring a high-growth, real-world startup that represents the future of property management in Africa.

There is a well-documented shortage of safe student accommodation in the area. This project will help reduce overcrowding in universities Support students who would otherwise struggle to attend Improve academic success by providing stable living conditions.

Gross passion to provide decent accommodation to student which offers a 360 degree service

I've been waiting/in line for a student accommodation project for over 5 years

I'm a young and highly driven professional who has acquired extensive knowledge and experience in the property development and management space. Coupled with my experience a a Civil Engineering and an entrepreneur the sky is only the start to what I can achieve.

I am a very energetic aspiring property player, I have been conceptualizing a number of property deals and battling to close due to lack of Capital. I will be very grateful to be given a chance and present my interest in front of potential funders.

I represent an emerging developer actively working on delivering affordable, well-managed student accommodation in Johannesburg, with a current project at 29 Kotze in Braamfontein. My work is not theoretical – I am in the process of securing funding, navigating approvals, and bringing a real project to market in a sector that urgently needs scalable solutions.

Being sponsored to attend the 7th Annual Student Accommodation Summit would provide critical exposure to industry leaders, funders, and operators, directly strengthening my ability to execute this project and future developments. The insights, partnerships, and knowledge gained will have a tangible impact not only on my business, but on the quality and accessibility of student housing I aim to deliver.

Importantly, I bring a grounded, entrepreneurial perspective as a young black developer building within the affordable housing segment – a voice that aligns with the transformation and inclusion goals of the sector. Sponsoring my attendance is therefore not just an investment in one individual, but in the growth of a pipeline of impactful, locally-driven student accommodation developments.

I am committed to translating the opportunity into action, relationships, and ultimately, delivery.

I believe this is a bankable project. All the due diligence have been performed and the place is less than 2.5km from University of Johannesburg Doornfontein campus which is the target market with high demand.

I believe BeMore should choose me because I am a disciplined, hardworking lady who is very passionate about property investing and willing to make positive contribution to the industry

Because I am young professional who is building her career within the property space.

As emerging property developer is important for me to attend to get exposure to funders and learn more about other opportunities available

BeMore should choose Imbeu Development and Project Management because it's committed to addressing the shortage of student housing in South Africa as well as contribute positively to the built environment and property development sector at large. Imbeu is seeking seed capital to allow the project to get to a construction-ready stage where all feasibility studies, market research, design development, statutory approvals, etc have been completed. In order to not only support students who require student housing in future but also to assist in employing South Africans through property management and maintenance allocations as well as support SMME's during the construction stage.

Attending the Summit will provide valuable insights into I can better structure projects. I am currently exploring an opportunity and also looking into getting funding support.

TERMS & CONDITIONS – BEMORE DEVELOPER CATALYST PROGRAMME

By submitting this application, you ("Applicant") agree to the following terms:

1. Purpose of the Programme

The Bemore Developer Catalyst Programme ("Programme") in partnership with PBSA is designed to identify, support, and showcase emerging property developers by providing access to mentorship, deal preparation support, and potential exposure to funding institutions.

Participation in the Programme **does not guarantee funding, partnership, or investment.**

2. Eligibility & Accuracy of Information

The Applicant confirms that:

All information provided is **true, accurate, and complete**

They have the **authority to submit the project**

The project is not subject to undisclosed disputes or legal constraints

Bemore reserves the right to **disqualify any application** found to contain misleading or false information.

3. Selection Process

Submission of an application does **not guarantee selection**

A panel will shortlist applicants based on internal criteria (including viability, impact, and readiness)

Decisions of the selection panel are **final and not subject to appeal**

4. Pitch Participation (Dragon's Den)

Shortlisted applicants may be invited to present their projects to funding institutions and partners.

The Applicant acknowledges that:

Participation is voluntary

Feedback from panelists is **non-binding**

No funding commitment is implied

5. Intellectual Property

The Applicant retains ownership of their project and intellectual property

By participating, the Applicant grants Bemore and Programme partners a **non-exclusive right to review, discuss, and evaluate the submission**

Bemore and partners undertake to treat submissions with **reasonable confidentiality**, but the Applicant acknowledges that:

Similar ideas may exist independently

No liability arises from similarities with other projects reviewed

6. No Advisory or Financial Guarantee

The Programme does not constitute:

Financial advice

Investment solicitation

A guarantee of funding or deal closure

All funding decisions are made independently by participating institutions.

7. Use of Information

Applicant information may be used for:

Programme evaluation and selection

Engagement with potential funding partners

Internal analysis and reporting

No information will be sold or shared outside Programme partners without consent.

8. Marketing & Publicity

Shortlisted participants agree that:

Their name, project name, and general project description may be used for **marketing and promotional purposes**

Any detailed or sensitive information will only be shared with consent

9. Limitation of Liability

Bemore and its partners shall not be liable for:

Any loss arising from participation in the Programme

Funding decisions made by third parties

Business outcomes resulting from participation

10. Right to Amend

Have read and understood these Terms & Conditions

Agree to be bound by them

30 responses

CONSENT TO PROCESS PERSONAL INFORMATION (POPIA)

By submitting this application, I hereby:

Consent to Bemore Group and its Programme partners collecting, processing, and storing my personal and project-related information for purposes of:

Evaluating my application

Communicating with me regarding the Programme

Sharing relevant information with funding institutions and Programme partners

Understand that my information will be handled in accordance with applicable data protection laws, including the **Protection of Personal Information Act (POPIA)**

Acknowledge that I may request access to, correction of, or deletion of my personal information at any time, subject to Programme requirements
